**Dmitri Garbuzenko**

BIM and AIM Coordinator | RB Rail AS

★★★★★

With the help of Python and especially the pandas library, as the DataDrivenConstruction team does, we are now able to perform delivery checks four times faster.

With the help of Python and especially the pandas library, as the DataDrivenConstruction team does, we are now able to perform delivery checks four times faster. By turning IFC data into a pandas DataFrame and comparing it with quantification tables or classification databases, we have made our expertise fast and reliable.

**Nils Strumberger**

BIM-Coordinator | Fact GmbH

★★★★★

The DDC (Data Driven Construction) Excel Plugin is a game-changer, transforming proprietary CAD models into open source data frames for seamless integration and AI interaction.

It significantly improves workflows and offers exceptional value for money by saving time and boosting productivity. Highly recommended for anyone looking to enhance their projects with data-driven insights.

**Abdelrahim (Mohamed) D...**

BIM Manager | Consolidated Contractors C

★★★★★

DDC converter and Plugin is a fantastic and helpful tool for visualisation and quantification the meta data from Revit. Thanks for sharing such helpful tools!

**Prof. Dr.-Ing. Michael Bühler**

Co-Owner GemeinWerk Ventures

★★★★★

Be part of the movement with DataDrivenConstruction! Let's make true freedom in data formats a reality and catalyze a new era of productivity and innovation in construction.

The real and necessary journey from closed to "open" formats has not even started: True freedom in data formats—free from proprietary ties and accessible to all—is what we need to unlock innovation and collaboration across the construction industry, particularly benefiting the 99% of construction, i.e. SMEs and unchaining the sector for accelerated growth

**Daniel Glober**

BIM-Manager | SCHOLZE-THOST GmbH

★★★★★

Revit and IFC reports that used to take me almost weeks to create are now updated in just a few minutes. I was able to quickly understand what the DataDrivenConstruction did and thus extend and modify it to fit projects.

The DataDrivenConstruction team showed me examples of blocks and scripts that can automatically generate PDF, XLSX, and DOCX files that mark errors/defects in the model. Additionally, we also now do automatic checks for IFC structure, file naming, etc.

**Jānis Dzenis**

BIM Coordinator | Merks, SIA

★★★★★

This is a fantastic tool, haven't seen one like this in a long time. In this era, we have countless tools and methods for creating models, drawings, tables, and other forms of data.

The DDC Excel plugin provides me with the capability to manage information in alternative ways.

**Mohamed Touati**

Principal Data Scientist at Pixemantic

★★★★★

As a data scientist, I use data every day in every topic and field and think that data can appear in one format to make it easier to use and explore.

After I tried the DDC converter, it became the only solution for me to manage and convert all BIM documents. Thanks to DataDrivenConstruction, I can now work with all IFC and Revit files automatically without having to upload files to the server.

**Marie Annette Kittus**

BIM Manager | Estareal solutions

★★★★★

**Valerio Spini**

Settore RVCS

★★★★★

Great experience: Until now, I used to open IFC files in Blocknote to check the parameters and their structure.

Thanks to the DataDrivenConstruction converter I can check the parameters and see their structure directly in MS Excel in an orderly and SMART way, amazing!

**Vinod Kumar**

BIM Manager | Estareal solutions

★★★★★

DataDrivenConstruction approach is truly revolutionary and has the potential to transform the construction industry. It's amazing to see how you are empowering users to work with structured data in a user-friendly way, leveraging the power of Excel and open-source tools.

I'm sure that your Excel plugin and data management solutions will be a game-changer for construction projects. Keep up the fantastic work!

**Irina Fischer**

BIM Coordinator | OBERMEYER Group

★★★★★

The decision to use Jupyter Notebook for results verification turned out to be highly beneficial. Our experience with solutions from Data Driven Construction and Jupyter Notebook has been extremely positive.

Overall, the integration of solutions from Data Driven Construction and Jupyter Notebook has greatly improved our workflows. Their combined capabilities and performance have not only optimized data processing, but also produced meaningful results, making them highly recommended tools.

**Nicolas Merot**

Ingenieur BIM | Caeli Ingénierie

★★★★★

DataDrivenConstruction products revolutionize data management in construction! Their IFC and RVT to Excel converters enable smooth data analysis and extraction, optimizing project management and documentation.

automate the verification process

# CAD (BIM) data quality

data<sup>driven</sup>  
construction.io

Move to BIM level 3  
Your data is Yours

## Challenges

### Poor quality data

Errors in models and parameters can lead to significant financial losses.

### Integration complexity

Integrating data from different sources and formats requires significant resources.

### Closed data formats

The use of proprietary formats makes it difficult to access and process data.

## Objectives

Ensure high quality of data coming from CAD and BIM systems

Reduce errors and inconsistencies in models

Improve the process of data integration and processing for later use

## Solution

Data conversion  
Provides easy access and processing of data

Open Data Formats  
Use granular, structured data for simplified data integration

Process Automation  
Use Python and LLM to validate, analyze data

## 5 STEPS FOR ENSURING QUALITY OF CAD (BIM) DATA

- 01 Parameterization of the task
- 02 Creating validation rules
- 03 Fully automatic quality control
- 04 Fill the model with the right data
- 05 Presentation of verification data

## Key Benefits

### Improved Project Planning

Data analytics enable predictive modeling for better accuracy in timelines and budgeting

### Efficient Resource Management

Optimize allocation of materials, machinery, and manpower with real-time data

### Risk Mitigation

Advanced analytics help identify potential risks and devise proactive strategies to mitigate them

## Our Approach

### Data Integration

Seamless aggregation of data from various sources including BIM, CAD, and IoT devices

### Custom Analytics Solutions

Tailored analytics frameworks that align with specific project needs and goals

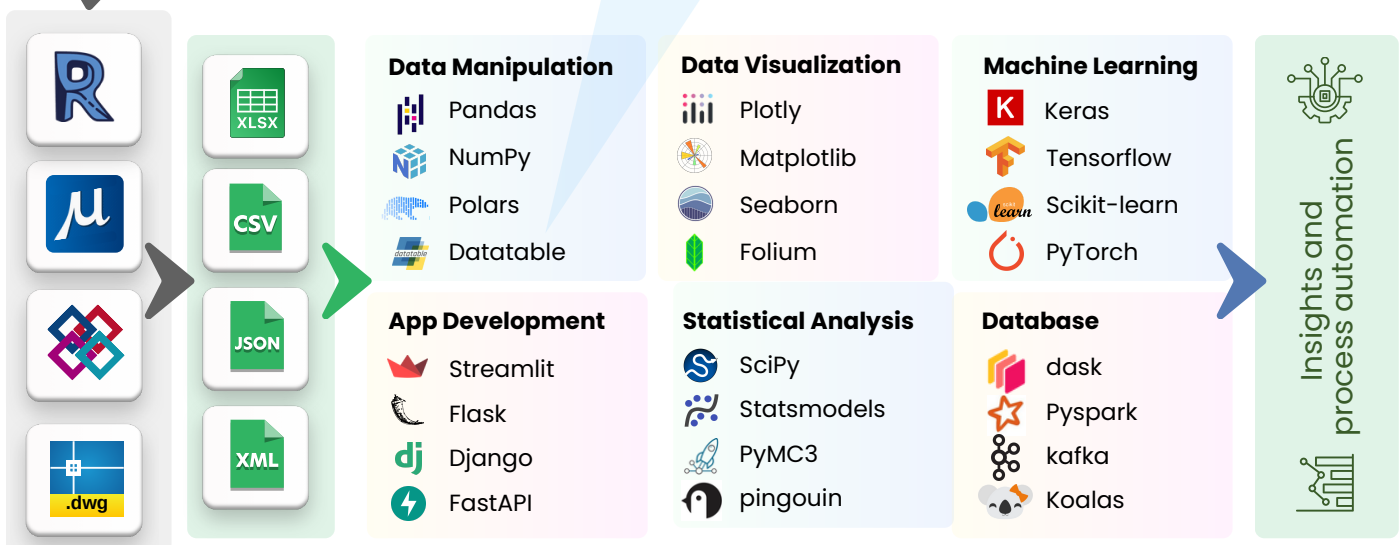

### Continuous Support and Training

Ensuring your team is equipped to utilize analytical tools and methodologies effectively

## GROUPING AND PROCESSING WITH ONE LINE OF CODE

```
Input
Filtering data in Revit and IFC projects.py
1 # Whether each element contains the values
2
3 df[df['Category'].isin(['Wall', 'Window'])]
```

Id	Category	Length	Volume
12577	Wall	3200	1.0
15889	Wall	5400	6.0
74456	Window	1700	0.5

```
Input
GroupBy Revit IFC.py
1 # Grouping a Revit or IFC project by parameters
2
3 df.groupby('Category')['Volume', 'Length'].sum()
```

Category	Volume	Length
Door	0.3	1300
Wall	7.0	8600
Window	0.5	1700

```
Input
Creating a PDF document.py
1 from fpdf import FPDF
2
3 # Determining the volumetric characteristics of the group
4 s_cat = 'Window'
5 dfq = df[df['Category'].str.match(s_cat)]
6 dfq = dfq.groupby('Category')['Volume', 'Length'].sum()
7 cat_len = str(dfq.iloc[0]['Length'])
8 cat_vol = str(dfq.iloc[0]['Volume'])
9
10 # Creating a PDF document based on the parameters found
11 pdf = FPDF()
12 pdf.add_page()
13 pdf.set_font('Arial', 'B', 16)
14 pdf.cell(190, 8, 'Category: ' + s_cat, 2, 1, 'L')
15 pdf.set_font('Arial', '', 14)
16 pdf.cell(190, 8, 'Sum of volumes: ' + cat_vol, 2, 1, 'L')
17 pdf.cell(190, 8, 'Sum of lengths: ' + cat_len, 2, 1, 'L')
18
19 # Saving a document in PDF format
20 pdf.output('c:\Report-DataDrivenConstruction.pdf', 'F')

# Moving from Files to Granular Data

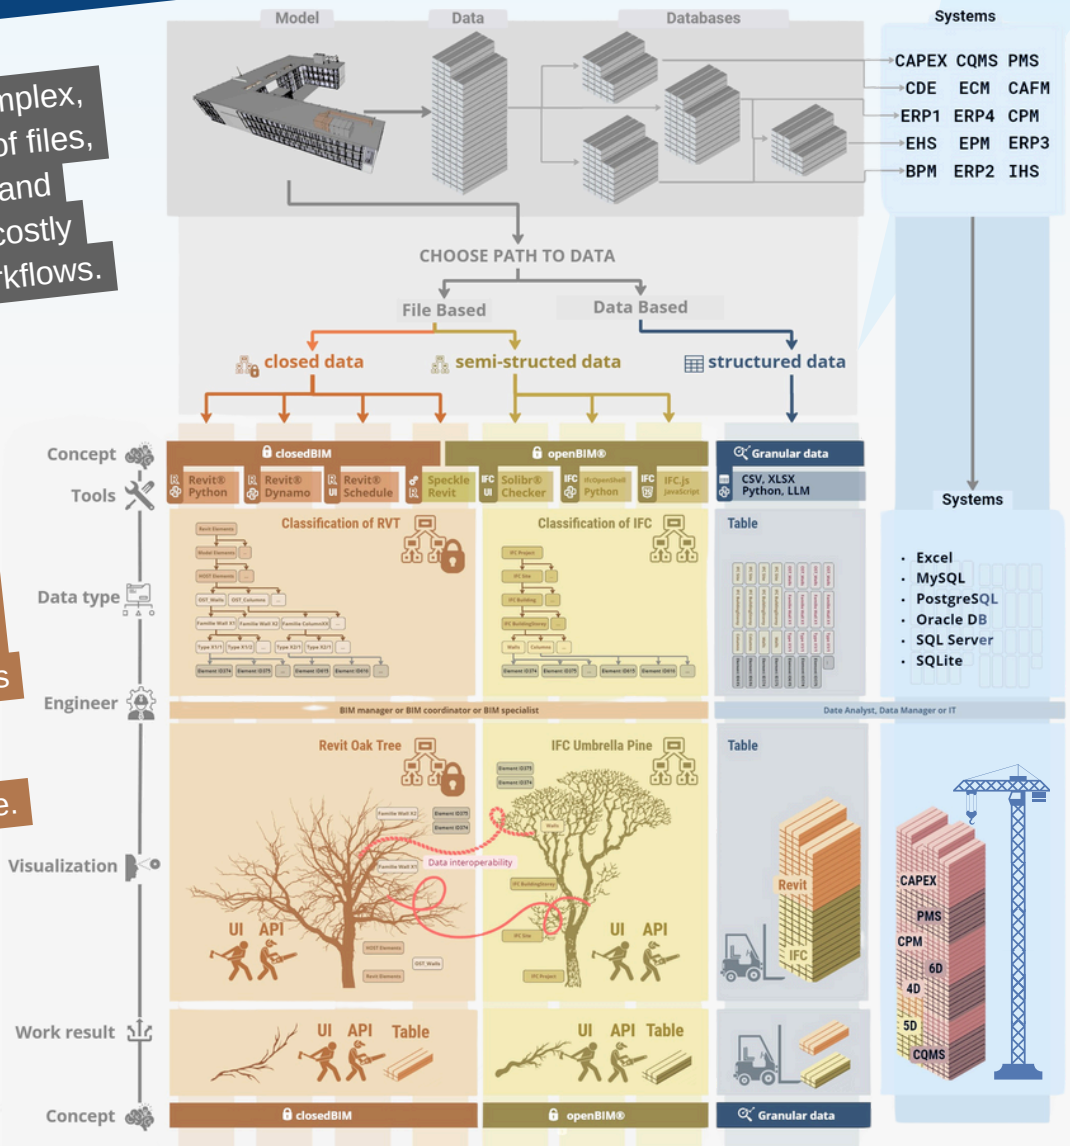

data  driven  
construction.io

CAD (BIM) project management is complex, the sheer number of files, different schemas and versions leads to costly and inefficient workflows.

Different project formats have different data schemas that need to be adapted to when processing each business case. Dozens of different schemas make unified data processing impossible.

Complex structured formats in semi-structured form make it difficult to access element properties.

With DDC Data Models, you unlock efficiency, reduce costs, and gain a reliable source of truth to achieve your project goals faster.

A word cloud of terms related to data science and analytics. The terms are arranged in a grid-like fashion, with some terms appearing in larger boxes than others. The terms include:

- BIM level 3
- granular data
- open data
- unified
- DataFrame
- LLM
- analytic
- open source tools
- data-driven decision
- structured data
- pipelines

Move to **BIM level 3** where only data and processes remain and where  your **data is yours**

# data-driven construction.io

Unlock the full potential of your construction projects with our specialized consulting services at DataDrivenConstruction.io. Our expertise in CAD (BIM) data integration and management transforms your workflow efficiency and decision-making process.

## What We Offer

### Customized Data Strategies

Tailored solutions for data collection, management, and analysis that fit your specific project requirements

### CAD Conversion and Integration

Streamline your project documentation with our advanced CAD conversion tools, making data easily accessible and usable

### Training and Support

Empower your team with the knowledge to leverage BIM data, enhancing productivity and innovation

## Your Benefits

### Reduce Costs and Save Time

Our strategies optimize resource allocation and project timelines

### Enhanced Decision Making

With better data at your fingertips, make more informed decisions that lead to successful project outcomes

### Competitive Edge

Stay ahead in the industry with cutting-edge data practices that set your projects apart

**Transform your approach with  
DataDrivenConstruction and lead  
your projects to success with data!**

Become our ambassador or partner and help spread the word about simple and open tools for working with CAD/BIM data

# Join the Open Data and Tools Movement!

We offer everyone the opportunity to be part of the future where data is accessible, open, and easy to integrate. With our support, you can transform complex design and construction processes into automated, efficient, and accessible solutions

data**driven**  
construction.io

 Move to BIM level 3  
 Your data is Yours

## Why Become an Ambassador?

### Influence the Industry

You will have the chance to directly impact industry standards and practices by promoting the use of open tools

### Exclusive Access to Resources

Gain early access to our materials, updates, webinars, and tools that will keep you at the forefront of innovation

### Build Your Personal Brand

As an ambassador, you position yourself as an expert in using simple and open technologies, boosting your reputation in the professional community

### Professional Growth

You will learn and grow alongside leading experts in automation, data analytics, and open formats, expanding your skill set

## Who Are We Looking For?

We are seeking enthusiasts, experts, and innovators who want to:

Promote the use of open data formats and tools

Organize training sessions, seminars, or webinars

Contribute to the development of open technologies through articles, blogs, social media, or videos

Collaborate with us to attract new companies and professionals to the use of simple and free tools

## How to Become a Partner?

### Submit an Application

Share your contact details and tell us about yourself, including why you're interested in this project

### We'll discuss cooperation together

We will provide you with all the necessary materials and instructions to become an expert in using our solutions

### Start Sharing Knowledge

Host training events, write articles, or share information on social media, helping others implement simple and open tools in their work

## Benefits for Ambassadors and Partners

### Exclusive materials and tools

### Discounts and bonuses on products and services

### Support from our team every step of the way

### Recognition for your contribution to the community

## Ready to Join?

Contact us to learn more about becoming an ambassador or partner, and let's build the future together with open data and simple solutions!

# DataDrivenConstruction Guidebook

## Navigating the Data Age in the Construction Industry

Don't miss  
your chance  
to enter a  
new era

**Martin Loureiro-Barrientos**  
BIM Coordinator | Populous, London

★★★★★

Probably the most interesting book of the last two years that I know of. Required reading to break free from the 'matrix' perpetuated by software vendors, this book delves into how emerging tools like artificial intelligence offer fresh opportunities for data management without extensive technical expertise, poised to revolutionize even the most antiquated sectors like construction.

With flawless translation and mind-bending graphics, it's a must-read. Eagerly anticipating the sequel. Very good buy in my opinion...

I will read it again and waiting for the second part!

**Paul Ransley**  
PLU Systems Engineer | Transport for London

★★★★★

I highly recommend Artem's book that addresses, as the title says, a data driven information management approach for AECO. I am currently using it to help initiate a number of discussions with various groups. I have found it a very accessible reference.

As well as a thorough overview of the history context of tools in AECO, data and introducing several key technologies the book contains a number of very useful diagrams, that outline the scope of data sources and end user artefacts, common database types encountered, applications working on that data and output artefacts in organisations or projects, with sample workflows.

It strikes me that these are the types of diagrams we need more of when developing and monitoring information strategies and contribute to BEP's - defining the overall enterprise data model onto which the boundary for a PIM and AIM can be overlaid.

**Pierpaolo Vergati**  
Senior Construction Project Manager | Rina

★★★★★

For anyone in the construction industry, from rookies to seasoned pros, this book is a game-changer! It's not your typical dusty read—it's packed with insights, strategies, and a touch of humor to keep you engaged. From ancient data recording methods to cutting-edge digital technologies, it covers the evolution of data usage in construction.

It's like taking a time machine through the evolution of construction data—minus the wonky flux capacitor.

And shoutout to Artem Boiko, our "Doc E. Brown", for crafting this data-packed journey!

Whether you're an architect, engineer, project manager or data analyst, this comprehensive guide will revolutionize the way you approach projects. Get ready to optimize processes, enhance decision-making, and manage projects like never before!

**Selih Ofluoglu**  
Ankara Bilim University | Dean, Faculty of

★★★★★

I think that the book addresses a significant, contemporary topic relevant to the construction industry. As it was also emphasized in the book, information is a crucial asset for the construction sector, and having it in accessible formats greatly facilitates accurate decision-making and expedites project timelines.

The book offers a neutral and efficient approach to accessing and taking advantage of this source in decision-making. The methodology presented in the book leverages a contemporary approach that combines artificial intelligence-driven programming with accessible open-source tools.

By harnessing the power of AI and utilizing open-source software, the methodology aims to enhance automation, optimize processes, and promote accessibility and collaboration within the field. The language of the book is clear and easy to follow.

Congratulations on the quality work! I have enjoyed reading it. Wishing you continued success as well.

**Natasha Prinsloo**  
BIM Coordinator | energlab UK

★★★★★

All I can say is, WOW! The way you incorporated history, ChatGPT, the graphics, and the overall ease of understanding your points is truly remarkable. The flow of the book is amazing.

There are so many brilliant aspects to this book; it's genuinely a game-changer. It's a great source of information, and I commend you for the effort and passion you've put into it. Congratulations on creating such a remarkable work. I could go on, but suffice it to say, I'm incredibly impressed!
